Our Previous works

Expert Corporation Corporate Gifting

Expert Corporation offers premium corporate gifting solutions to strengthen client and employee relationships. Using a task management system with multiple user roles, they streamline operations through web and mobile apps for better efficiency and collaboration.

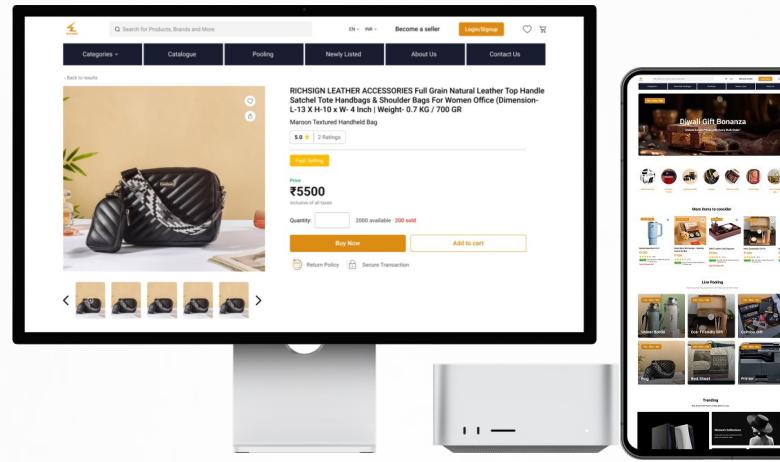

Aditya Infra Tech Construction

Aditya Infra Tech transforms construction with ERP-based software, optimizing workflows, ensuring accuracy, and enhancing efficiency. Exclusively web-based, it helps companies manage projects, resources, and operations seamlessly.

AVP Hospital Healthcare

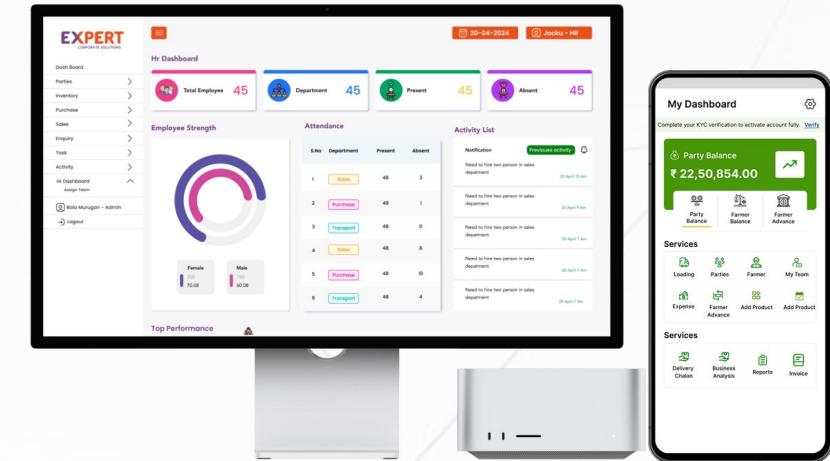

AVP Hospital uses software solutions to enhance healthcare, with a doctor learning app and an Ayush-focused hospital management app. Available on web and mobile, these tools streamline workflows and improve patient care.

Our Previous works

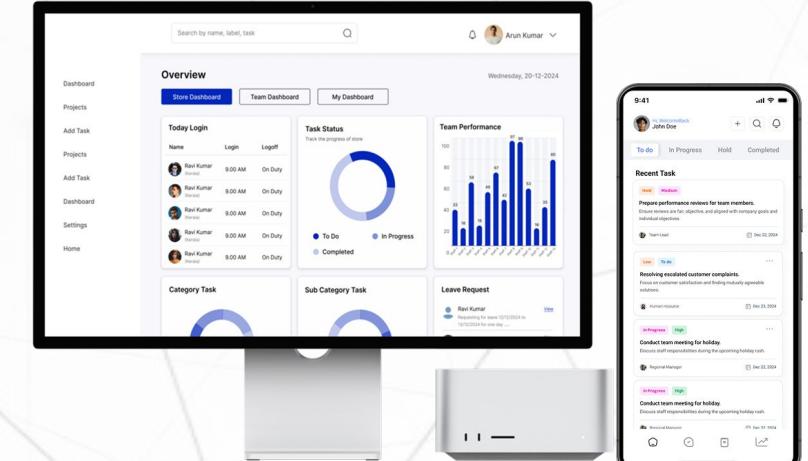

Excooso Customized Gifting

Excooso is a top e-commerce platform for customized gifting, offering personalized corporate and personal gifts. Its user-friendly website makes gifting effortless and meaningful.

Topical Water AgriTrade ERP

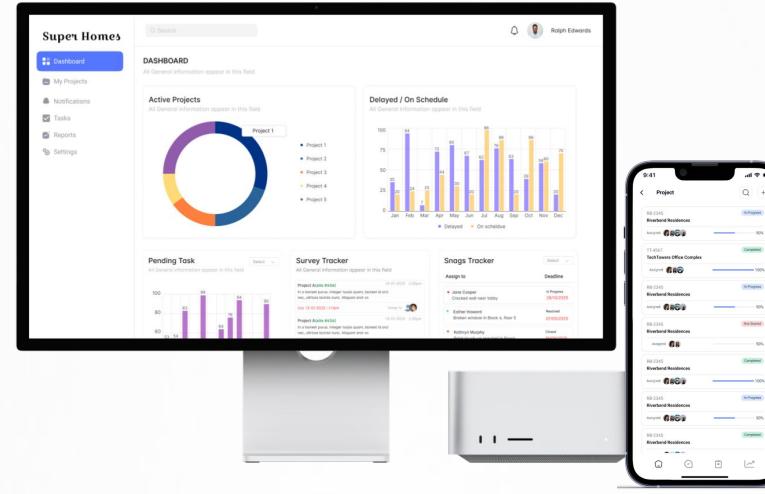

A SaaS-based ERP for traders working with farmers and parties across India, streamlining payments, reducing errors, and improving financial transparency.

Rootments Multi-Branch Rental Business Management

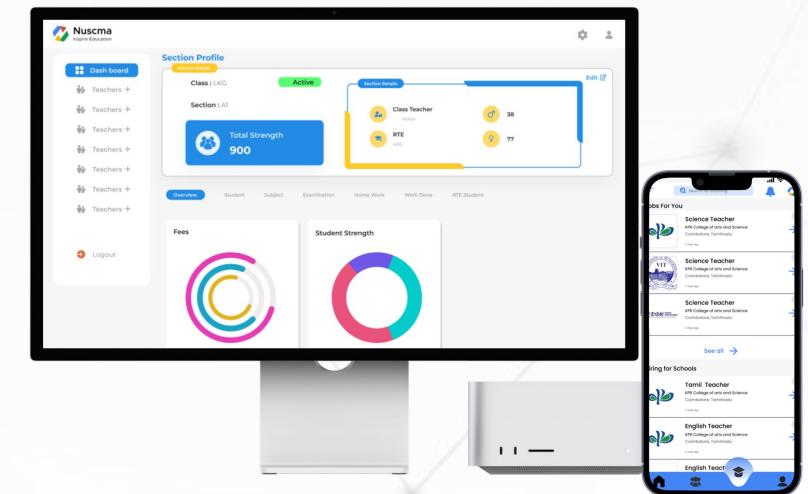

A centralized system linking 18 branches of a Kerala-based groom attire rental business, preventing manipulation and enabling structured expansion across India.

Our Previous works

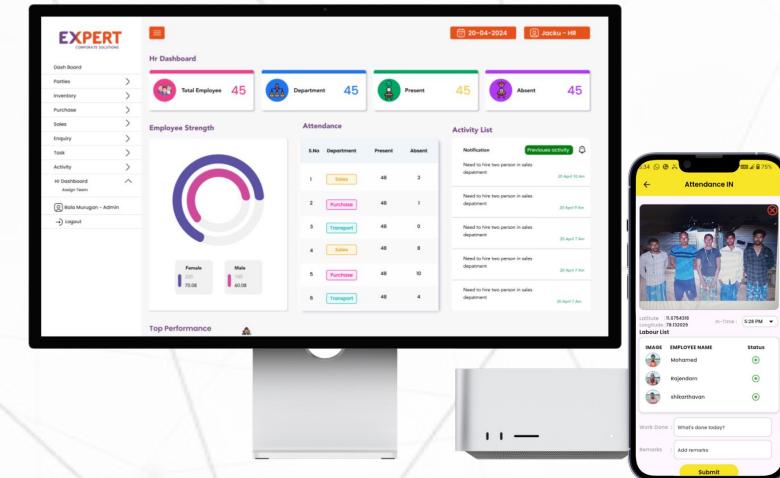

SuperHomes Construction

A customized construction management software that ensures project alignment using task management features on both mobile and web platforms. This system enhances efficiency by organizing tasks, tracking progress, and improving overall project execution.

Nuscma School Management Software

Nuscma simplifies school management by offering features like student and teacher management, fee collection, overdue tracking, attendance, and academic records. It streamlines administrative operations, improving overall efficiency and helping schools enhance student performance.

DLR Construction Construction

DLR is an advanced face recognition software designed for construction labor management. It enables accurate attendance tracking, daily working hours monitoring, and work progress evaluation. The software also calculates one-day work-based value.
